LEARNING OBJECTIVES:

Upon completion of this activity, participants should be able to:

1. Explain how population heterogeneity can occur at the race and ancestry levels, which are independent yet highly related concepts.
2. Describe how DNA repair pathway perturbations extend to the ATR pathway in triple negative breast cancer.
3. Recognize how new spatial transcriptomic technologies allow us to evaluate the tumor microenvironment in an unbiased way.

Speaker Disclosure:
Dr. Carpten has disclosed that he has no relevant financial relationships. No one else in a position to control content has any financial relationship(s) to disclose.

Accreditation: The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Credit: The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
