UF Health Cancer Center Oncology Grand Rounds
Presents

“Treating Oligometastases with Stereotactic Radiotherapy”

Michael Milano, MD, PhD
Professor, Department of Radiation Oncology
University of Rochester School of Medicine and Dentistry

Wednesday, November 20, 2019
12:00 – 1:00 pm
Communicore C1-004

Videostreaming:  https://mediasite.video.ufl.edu/Mediasite/Play/30591bf5f87a4b65bf0e3aec44091a8a1d

LEARNING OBJECTIVES:
Upon completion of this activity, participants should be able to:
1. Describe and define the metastatic state of “oligometastases.”
2. Discuss recent randomized Phase II studies in which patients were randomized to receive or not receive metastasis-directed radiotherapy for oligometastases.
3. Explain why patients with limited metastases may benefit from combining immunotherapy with stereotactic radiotherapy to select sites of disease.

Speaker Disclosure:
Dr. Michael Milano has disclosed that he has no relevant financial relationships. No one else in a position to control content has any financial relationship(s) to disclose.
