UF Health Cancer Center Oncology Grand Rounds
Presents

“Personalized treatment strategies to improve the outcome for high-risk pediatric acute lymphoblastic leukemia”

Richard B. Lock, PhD, FAHMS
NHMRC Senior Research Fellow, Professor and Program Head, Leukaemia Biology Program
Children's Cancer Institute, Sydney, Australia

Wednesday, December 11, 2019
12:00 – 1:00 pm
Communique C1-004

LEARNING OBJECTIVES:
Upon completion of this activity, participants should be able to:

1. Identify high-risk subtypes of pediatric acute lymphoblastic leukemia and identify their underlying genetic lesions.
2. Define the mechanisms by which glucocorticoids induce apoptosis in malignant lymphocytes.
3. Describe at least one mechanism by which acute lymphoblastic leukemia cells develop resistance to glucocorticoids.

Speaker Disclosure:
Dr. Richard Lock has disclosed that he has no relevant financial relationships. No one else in a position to control content has any financial relationship(s) to disclose.

Accreditation: The University of Florida, College of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Credit: The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
